SUMMARY

Cybersecurity-focused Software Engineer and Full Stack Developer at Sam Houston State University. Developer of Simurg IDS/IPS, an open-source Intrusion Detection and Prevention System built with Python, and CypherDocs, an AI-powered cybersecurity workspace built with Next.js 15 and Google Gemini API. Finished 1st place at the Cisco Threat Hunting CTF at SHSU Cyber Forensics Intelligence Center. Dean's List honoree. Seeking cybersecurity and cloud-focused internship opportunities. Currently preparing for CompTIA Security+.

EDUCATION

Sam Houston State University
B.S. in Computer Software Engineering
GPA: 3.60

Huntsville, TX
Fall 2025 – Spring 2027

Firat University
B.S. in Computer Software Engineering (Dual-Degree Program)

Elazig, Turkey
2024 – 2025

HONORS & AWARDS

- **Dean's List of Academic Honors** — College of Science & Engineering Technology Fall 2025
- **1st Place — Cisco Threat Hunting CTF** | Cyber Forensics Intelligence Center, SHSU March 2026

SKILLS

Languages & Frameworks: C, C++, C#, ASP.NET Core, Python, HTML/CSS, Django, React.js, Next.js, Tailwind, SQL
Security & Infrastructure: Wireshark, Kali Linux, ELK Stack, Security Onion, SIEM, MITRE ATT&CK, Intrusion Detection & Prevention, Network Traffic Analysis, CCNA Foundations
Tools & Environments: Linux Terminal, Git/GitHub, Entity Framework Core, MySQL, Windows/Linux Server Admin
Professional: Cross-Cultural Communication, Technical Documentation

EXPERIENCE

Project Lead – Academic Software Development March 2024 – August 2025
Firat University | Elazig, Turkey

- Spearheaded student-led software initiatives, managing full SDLC for desktop applications.
- Orchestrated team sprints and technical milestones ensuring alignment with quality standards.

Freelance Software Developer February 2022 – March 2023
Fiverr | Remote

- Delivered custom software solutions for international clients using C# and Python.

PROJECTS

Simurg IDS/IPS — Open Source Intrusion Detection and Prevention System | *Python*
• Modular IDS/IPS with zero external dependencies. Multi-source log ingestion, rule engine detecting SQL Injection, XSS, Brute Force and DDoS attacks, MITRE ATT&CK integration, and autonomous IP blocking via iptables.

CypherDocs — Full Stack Cybersecurity Workspace | *Next.js 15, Tailwind, Google Gemini API*
• Interactive cybersecurity platform with Kali Linux-inspired terminal, AI-powered security assistant, and Red/Blue Team documentation. Live at cypher-docs.vercel.app.

Restaurant Management System | *C#, ASP.NET Core, Entity Framework Core, MySQL*
• Full-stack web application with role-based authentication via ASP.NET Core Identity, EF Core ORM, and MySQL. Built for SHSU Database Systems course.

Red-Black Tree Visualizer | *C#, .NET* **Automated Inventory Management System** | *C#, SQL*
• Self-balancing tree visualizer with rotation and recoloring logic. • CRUD inventory platform with SQL data persistence and real-time product dashboard.

CERTIFICATIONS

- **Partner: NDG Linux Unhatched**
- **Cisco Introduction to Cybersecurity**
- **CCNA: Introduction to Networks**
- **Cisco CyberOps Associate** — Networking Academy (52 Hands-on Labs, Security Onion, ELK Stack)
- **CompTIA Security+** — In Progress (Expected April 2026)
